SUMMARY

Final-year B.Tech Computer Science (AI & Robotics) student at VIT Chennai with strong analytical and problem-solving skills, complemented by experience in AI, data analytics, and software engineering. Experienced in developing data-driven solutions and translating complex requirements into practical, scalable outcomes through projects and an internship at DRDO-DEAL. Demonstrated leadership through campus organizations and team-based initiatives, with a strong interest in solving business problems through technology, data, and structured thinking.

EDUCATION

B.Tech in Computer Science and Engineering (AI & Robotics) 07/2023 – Present
Vellore Institute of Technology (VIT), Chennai, India Chennai, India
Expected Graduation: August 2027

PROFESSIONAL EXPERIENCE

AI & Software Engineering Intern 05/2026 – 06/2026
DRDO – Defence Electronics Applications Laboratory (DEAL) Dehradun
- Developed AI-powered defence applications using Python, FastAPI, RAG, LLMs, and vector databases.
- Built REST APIs and automated document-processing pipelines for scalable information retrieval.
- Worked with scientists to translate functional requirements into secure, production-ready software.
- Received an Excellent performance evaluation.

SKILLS

Languages — Python, SQL, Java, C++, JavaScript

AI/ML — LLMs, NLP, RAG, scikit-learn

Backend — FastAPI, Flask, Node.js, REST APIs

Frontend — React, Next.js, Tailwind CSS

Databases — PostgreSQL, MySQL, MongoDB, Firebase

Tools — Docker, Git, Linux, ROS, Arduino

LEADERSHIP

Discipline Lead, HARYANA HOOD 09/2025 – Present
Event coordination & management

Management Lead, Linux Club 10/2023 – Present
Event operations & open-source initiatives

Core Member - Vocalist, Music Club VITCC 10/2023 – Present
Live performances & teamwork

PROJECTS

DEFENCE ACQUISITION & PROCUREMENT SYSTEM (DAPS) 05/2026 – 06/2026
AI-powered defence procurement intelligence platform
- Developed an AI-powered procurement information platform using FastAPI, BM25, and LLMs.
- Built scalable document-processing and semantic search pipelines.
- Designed REST APIs for intelligent document retrieval and question answering.

MEDVISION AI 09/2025 – 09/2025
Surgical navigation simulator project utilizing AI
- Developed a multilingual RAG system reducing query time by 40%
- Built scalable backend services using FastAPI and PostgreSQL
- Designed real-time 3D visualization for complex datasets
- Focused on system design for efficient data retrieval

SMART BLIND STICK 12/2024 – 01/2025
Assistive technology for visually impaired users
- Engineered an assistive device using ultrasonic sensors for obstacle detection
- Improved detection accuracy through real-world testing and calibration
- Focused on practical deployment and usability

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional 22/06/2026
Oracle University
Oracle Certified Professional in Generative AI and Oracle Cloud Infrastructure.
